

Defence Asset Management Community of Practice

Community of Practice May 2022

Co-Chair Introduction

Jeremy Hammond – Dreadnought Engineering Project Manager
Transition into Service

Perspectives

Source: The Institute of Asset Management

Asset Management means different things to different people:

- *Engineering – Group 3*
- *Supply Chain – Group 5*
- *HR = Group 5*
- *Commercial – Group 3*
- *Senior Executive – Group 2*
- *Information and Knowledge Management – Group 4*
- *Primary Asset Owners – Group 1*

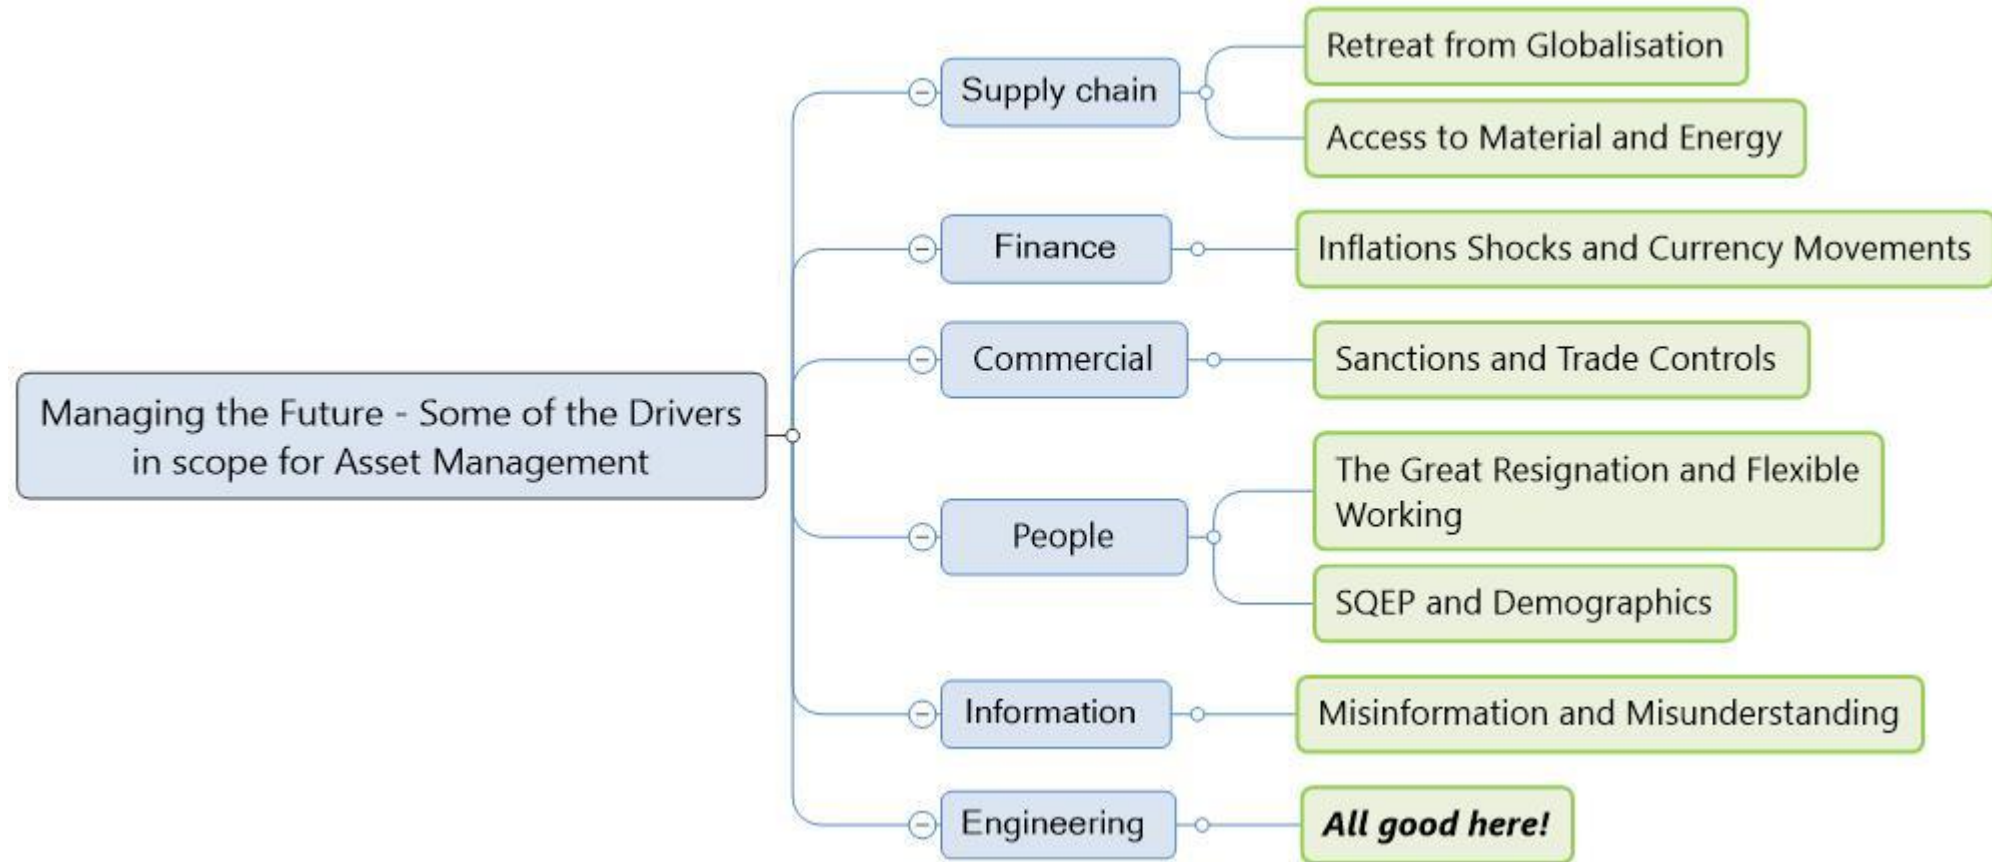

There is no implied hierarchy – asset management requires consideration of all elements in a coherent and consistent manner across the extended enterprise

Change....

..or Tumult?

Something Lurking in the Woodshed

So What?

- Asset Management is much more than just a technical discipline.
- Enterprise collaboration is essential for coherent Asset Management solutions.
- Asset Management leadership needs tough love.

A high-angle photograph of a rescue operation. A white and red rescue helicopter with the registration 'EC-119' is hovering over a steep, rocky cliffside. Several rescue workers in orange gear are positioned on the cliff, some appearing to be rappelling or preparing equipment. The background is a vast, deep blue ocean. The text 'Creating a safe and secure world, together' is overlaid in a white box in the center of the image.

**Creating a safe and secure world,
together**
