Introduction to Logiq

Logiq in a Nutshell

Logiq is a NCSC-assured cyber security consultancy and secure solutions provider focused on safeguarding critical organisational and client data.

Our mission is to make security the foundation of every business, helping clients understand their cyber security risks and improve their security posture.

Logiq ensures businesses can deliver their services securely without security becoming a barrier.

What is DISX?

DISX is a secure off-the-shelf mobile IT platform designed for highly regulated sectors, supporting the production, storage, and sharing of sensitive information including UK Government Official-Sensitive information.

Key Strengths:

- **Secure:** Built to NCSC & MOD standards delivering 'Compliance-as-a-Service' for those working with government and with Critical National Infrastructure organisations. Compliant with a range of standards including CE+, DEFSTAN 05-138, ISO27001 Annex A controls, etc.
- **Flexible:** Hosts bespoke apps, secure cloud services, etc
- **Collaborative:** Enables seamless working across industry and government
- **Fully Managed:** Fully supported by security cleared personnel, constantly updating, patching, and monitoring the service

DISX Capabilities & Service Offerings

DISX has a vast number of capabilities to support compliant and secure working, trust by 200+ organisations, which includes but not limited to:

- **Multiple Variants:** Pro, Lite, Air, Mail – to suit different needs and budgets
- **Cutting-edge productivity:** Full suite including design tools, document sharing (including MOD), and direct access to DEFNet, MCN, and other private networks as required.
- **Rapid onboarding:** Bespoke applications and secure connectivity
- **Service management:** Incident response and remediation, new service requests, ongoing security reviews, pen testing, and constant security monitoring.
- **Customisable:** Can be modified to deliver more bespoke requirements whilst offering the benefits of a commoditised product.
